APPROVED FOR PUBLIC RELEASE

Adobe Experience Manager (AEM) Capabilities

AKO is being modernized and rebuilt based on the Adobe Experience Manager (AEM) platform including but not limited to the following AEM products:

- AEM Sites – an easy to use tool to author, manage, deliver content and personalize experiences across all channels including mobile devices and responsive design.
- AEM Assets – provides flexible workflows and tagging to produce and manage content efficiently for AKO.
- AEM Communities – provides a collaboration capability for user groups enabling those users to tailor their space to a variety of specific needs based on available components.
- Adobe Analytics – allows for the collecting, organizing, analyzing and reporting on everything end users do.
- Adobe Target – permits the identification of AKO's best content in order to deliver the right experience to the right customer.

PEO Perspective March 2019

Women's History Month first began as Women's History Week in 1978, a municipal celebration in Santa Rosa, California, highlighting women's historical and cultural accomplishments. In 1980, a consortium of women's groups and historians successfully lobbied for national recognition, and in February 1980, President Jimmy Carter issued the first Presidential Proclamation declaring the week of March 8, 1980, as National Women's History Week. It wasn't until 1987 when Congress, realizing that just a week wouldn't do justice to the breadth of women's contributions to the fabric of our nation, passed Public Law 100-9, designating March as "Women's History Month."

And what a long way we've come, both in our nation's history, and in our Army.

Every March we pause and take the opportunity to celebrate the contributions of female Soldiers, Army civilians and contractors in the defense of our great nation, and I would be remiss if I didn't highlight some of the women leaders at PEO EIS who continue to inspire and achieve greatness.

Among these are: Debra Lee, Director, Human Resources; Tara Clements, Director, Strategic Communication; Michelle Walker, Acting Director, Deputy for Acquisition and Systems Management; Nancy Richardson, Product Lead, Army Enterprise Systems Integration Program (AESIP) Hub; Heather Putman, Acting Product Director, General Fund Enterprise Business System (GFEB) Development and Modernization; Lt. Col. Christine Youngquist, Product Manager, Acquisition Management Support Solutions AND Acting Product Manager, GFEB – Sensitive Activities; Lt. Col. Laverne Amara, Product Manager, Integrated Personnel and Pay System-Army (IPPS-A) Increment II; Lt. Col. Leliani Tydingco-Amarante, Product Manager, Cyber Analytics & Detection (CAD); Sarah Bearden, Product Lead, Enterprise Content Collaboration & Messaging (EC2M); Lareina Adams, Product Lead, Headquarters Army Environmental System (HQAES); Judith Avery, Acting Deputy Project Manager, AESIP; and Patricia Ocasio, Deputy Project Manager, IPPS-A.

We are grateful to all of the dedicated and talented women across PEO EIS working for our team and on behalf of Soldiers – their dedication and wisdom guides us to success every day.

At a Twilight Tattoo reception last year, Under Secretary of the Army Ryan McCarthy spoke about the importance of investing time in establishing personal relationships with legislators. He recognized that fostering an understanding among Congressional members and their committees of the complex issues facing the Army is good for the Army and for our nation.

Last month, PEO EIS hosted a delegation of professional staff members from the House Appropriations Committee – Defense (HAC-D) at our headquarters in Fort Belvoir for an overview of our portfolio and a series of briefings focusing on the Army Leader Dashboard, IPPS-A, and Defensive Cyber Operations. *Building relationships with Congress is critical to our being able to deliver agile, innovative and modernized solutions to Soldiers that help them to accomplish their missions.*

On the first day of March, it was my distinct pleasure to host a ceremony promoting Acting Deputy PEO Brendan Burke to the Senior Executive Service. Only the best are selected for the honor of appointment to the SES, and it is only by the confirmation of the Secretary of the Army that these professionals achieve the position.

It takes a keen skill set to meet the numerous qualifications to be confirmed. Key among these are professional integrity, a broad perspective and commitment to the highest ideals of public service – as well as the proven ability to execute exceptional executive leadership.

Mr. Burke not only meets but exceeds these qualifications as he brings to the job nearly 20 years of government experience in all levels of technology management and development. The Army has made an excellent choice, and I couldn't be more proud...

Congratulations to our newest SES, Mr. Brendan Burke!

I hope you will also join me in congratulating Billy McCain of GCSS-Army, recipient of the 2018 Defense Acquisition Workforce Individual Achievement Award for Life Cycle Logistics!

This award is an incredible honor, and is recognition of Billy's great work as the product support manager for GCSS-Army. Billy led a team of 118 personnel through migrating more than 20,000 Army units to the new system, converting property valued at over \$356 billion, issuing more than one million training certificates, and fielding nearly 22,000 handheld terminals. Billy was also selected as the Army Acquisition Executive's Excellence in Leadership Logician of the Year in 2018, and he continues to impress.

On March 13, the Product Manager Wideband Enterprise Satellite Systems (Pm WESS), part of the Project Manager Defense Communications and Army Transmission Systems (PM DCATS) portfolio, takes part in an historic event as they launch the *Wideband Global SATCOM-10 (WGS-10)* in partnership with the Air Force, the United Launch Alliance and Boeing, to deliver enhanced, high-capacity satellite communications capabilities to Soldiers and allies around the world.

AKO 2.0 Priorities

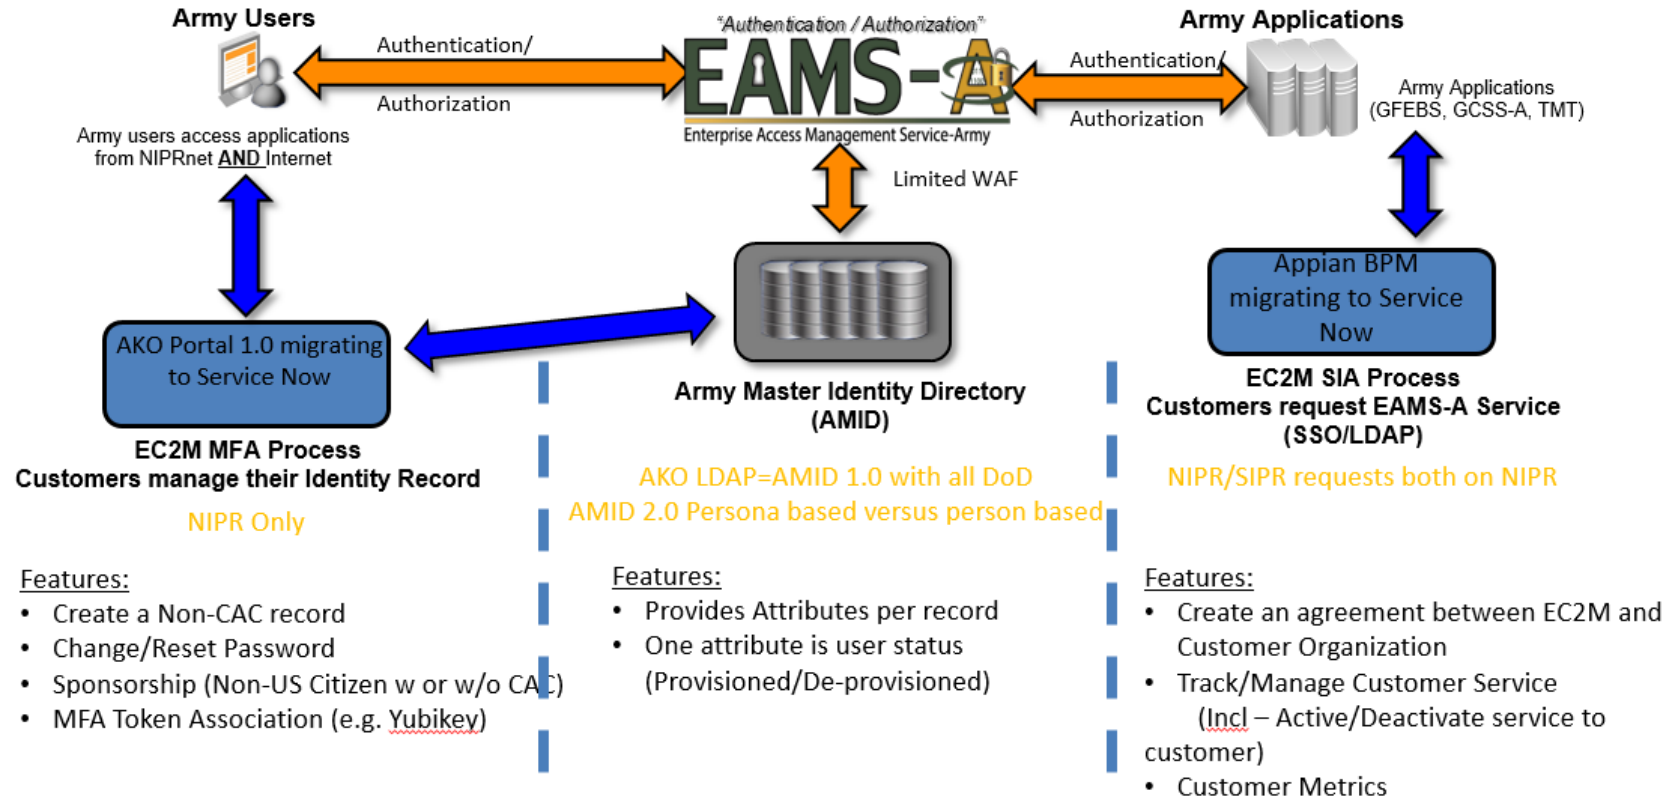

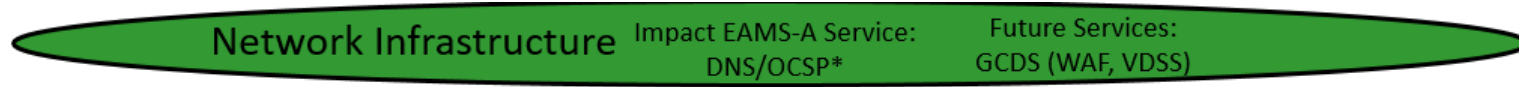

- Migrate AKO 2.0 to a Cloud Hosted Environment
- Continued communities development/support to organizations
- Continuous portal development and enhancements leveraging Agile best practices
- Integration of AEM Campaign and Live Fyre

EAMS-A Overview

EAMS-A and AMID 1.0 exist on SIPR to support SIPR applications
